# **INFRATUBE**<sub>TM</sub>

#### MEDIUM WAVE INDUSTRIAL INFRARED HEATERS

W SERIES Up to 4000 watts / 13684 btu's Single Element

**Infratech W series Heaters** are versatile electric infrared units for industrial applications. The fixtures can be used on open frames or in grated into existing oven enclosures.

**Electric infrared curing** enhances manufacturing processes and typically improves finish quality and adhesion. Electric infrared curing works well with virtually all air dry coatings including; primers, sealers, base coats, stains, varnishes, clear coats, adhesives, and top coats.

**The Infratube fixtures** are compact and energy efficient with a curved parabolic reflector to uniformly distribute heat. These fixtures are reliable with no moving parts and long lasting tubular quartz infrared heating elements.

**Infratube fixtures** are easy to install and have a variety of mounting options that include flush mount frames and surface mount brackets.

**All Infratech units** are UL Listed and are available with a wide variety of UL Listed control options. One year manufacturers warranty on all equipment.

#### FLUSH MOUNTING FRAME

## **Infratech Infratube fixtures** are commonly used in many applications including:

- Woodworking
- Laminating
- Web Processing
- Shrink Wrap
- Pre Heating
- Plastic Forming
- Dry Off
- Spot Curing
- Powder Coating
- Automotive Refinishing

#### MANY DIFFERENT CONTROLS ARE AVAILABLE

Simple, cost effective Input Regulators State of the art *Digital* Solid state and analog controls. Up to 50 amps. Many options available, including multiple zones, timers and non contact infrared thermocouples.
