The SRU-1615 is the nation's number one selling infrared curing machine. It features 1,500 watts of power and is available in 120 or 240 volts. Coverage area is over 2' x 3' and is ideal for small area repairs; heavy duty stand adjusts to over 6' high for curing

tall objects. A conveniently located On/Off switch and a parabolic reflector allow for uniform heat distribution. The SRU-3215 is the same great unit as the SRU-1615 except it has two 1,500 watt heads for double curing power, a 3' x 4' coverage area, and 3,000 watts of power. These units are suitable for use with all industrial finishes, including adhesives and resins. These Speed-Ray units are energy efficient, and operate for only pennies per hour.
