

MAXIMIZE COMFORT AND DESIGN IMPACT WITH SLEEK, HIGH-POWERED NEW C-SERIES HEATERS FROM INFRA TECH.

[APRIL 3, 2019] GARDENA, CA - Now you can maximize warmth in your outdoor space without compromising the design with Infratech's sleek, minimalist new Contemporary C-Series. Infratech heaters have long been amenities of choice for the most upscale restaurants, night clubs, hotels, resorts and residential properties because we offer the widest range of design options in the outdoor comfort heat category. Today, we're excited to expand those options yet again, with our designer-friendly, high-powered C-Series single element and CD-Series dual element heating systems.

Why choose Infratech C-Series and CD-Series:

- C-Series and CD-Series heaters are ideal for use in high visibility locations where design is a consideration and concentrated heat output is desired.
- They incorporate inset mounting brackets that create a floating effect when mounted, for a streamlined, minimalist profile that complements any architectural style.
- C-Series and CD-Series provide significant heat output and can be used in applications with mounting heights of 7-11 or 8-14 feet, respectively.
- Choose from brushed stainless steel, standard and custom color finish options, for a look that seamlessly blends into the surrounding decor.
- C-Series and CD-Series heaters are compatible with a variety of control options – including solid state controls with multiple zoning capabilities – for optimal versatility, convenience and style.
- Like all Infratech products, C-Series and CD-Series heaters are proudly made in the USA from durable 304 stainless steel that is capable of withstanding years of exposure to the elements, and are supported by Infratech's Three-Year Warranty – the most extensive in the industry.
